2-BUTTON UNIVERSAL REMOTE CONTROL

One Remote. Universal Access.

The Universal Remote Control is compatible with most major brands of garage door openers, gate operators, and commercial door operators. It delivers the latest in security and performance, and provides a convenient, cost effective way to consolidate the number of remotes in your vehicles, replace lost or broken remotes, or compliment an existing access system.

Performance

- **Operates up to two brands of garage door openers** eliminating the need of multiple remotes on your vehicle visor.
- **Universal compatibility** allows you to operate two different garage door manufacturers and/or frequencies at the same time.
- **1-year** limited warranty.

Safety and Security

- **Security+ 2.0®** safeguards your household – with every click a new code is sent to the garage door opener so that the door opens only for you.
- **Tri-band operating frequency** virtually eliminates interference and extends range.

Compatibility

Works with most major garage door opener brands with photo eyes:

- Chamberlain®
- Craftsman®
- Genie®
- LiftMaster®
- Linear/Moore-o-Matic®
- Overhead Door®
- Stanley®
- Wayne-Dalton®
- 300/310/315/372/390 MHz compatible*

*Not compatible with garage door openers manufactured by Marantec or Hormann.

Please see compatibility section on back for full list.

Optional Accessories:

UNIVERSAL WIRELESS KEYLESS ENTRY (387LM)

Open or close your garage door without a remote control or key and close it with the push of a button. It works with a code that you program. You can also program a temporary entry code for friends and service people.
